HOSTEUR RAGNARØKKR

PRODUCT SHEET

HOSTEUR

RAGNARØKKR

HOW DOES HOSTEUR RAGNARØKKKR WORK?

HOSTEUR RAGNARØKKR is a cloud platform developed in collaboration with our partner Jelastic.
The solution allows you to pay only for what you actually use and not for a monthly subscription.

With HOSTEUR RAGNARØKKKR you can deploy your platform with a single click and start working on your projects instantly!

To save time, you can also benefit from our list of preconfigured applications specially optimized for HOSTEUR RAGNARØKKKR!

FOR WHOM IS IT DESIGNED?

HOSTEUR RAGNARØKKKR is designed for developers, companies and vendors of software as a service (SaaS).

EASY TO DEPLOY

Deploy your Java, PHP, Ruby, Node.js, .NET and Python applications without code modification using Docker, GIT, SVN or integrated plugins such as Maven, Ant, Eclipse, NetBeans, IntelliJ IDEA

ADJUSTMENT OF RESOURCES

Our system will automatically resize your application vertically and horizontally during peak loads. Traffic is distributed uniformly with a load balancer on several instances.

EASY TO MANAGE

The dashboard provides an intuitive application topology wizard, deployment manager, access to log and configuration files, team collaboration functionality and integration with CI / CD tools.
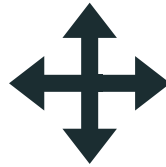

MAIN FEATURES

Easy creation of development, testing and production environments

No downtime with the automated traffic distribution

Automated vertical and horizontal scaling of resources

Quick configuration of clustered applications and high availability

Support for micro services and legacy applications

TCP and HTTP load balancing (S)

MAIN FEATURES

Free and personalized
SSL certificates

Integrated CI/CD tools
for automation

Possibility to hibernate,
stop, restart, clone
applications

Integrated CPU, memory,
network and storage
monitoring with alert
notifications

Log logbook, file and
configuration manager in
the dashboard

Collaboration and
account sharing with
different access levels

SUPPORTED PROGRAMMING LANGUAGES

SUPPORTED APPLICATION SERVERS AND DATABASES

APPLICATION SERVERS

Tomcat
TomEE
GlassFish
Jetty
Apache
NGINX
Node.js
JBoss
SmartFoxServer
WildFly
Railo
WebLogic Server

DATABASES

MariaDB
MySQL
MongoDB
PostgreSQL
CouchDB
Cassandra
OrientDB
Redis
Neo4j
Microsoft SQL Server
Oracle DB
PerconaDB
